

PROJECT | **ABINGDON**  
LOCATION | **LONDON**  
FABRICATION | **STAIRCASE**

A stunning centre piece to open plan living without taking up lots of space. These stainless steel, walnut and glass stairs can certainly be classed as one of our designer staircases; it has a chunky design inspiration which doesn't over power the design of the interior space.

**| MATERIALS**

12mm TOUGHENED GLASS

FLAT STAINLESS STEEL HANDRAIL

WALNUT TIMBER TREADS

Good use of toughened glass and the space between the risers gives the staircase a translucent appearance and allows views to the space beyond. The design includes combining straight flight stairs, both 180° and 90° turns and landing balustrade over three floors.
