

PROJECT | **LIFFEY BRIDGE**
LOCATION | **DUBLIN**
FABRICATION | **BALUSTRADE**

The pedestrian bridge over the river Liffey in Dublin runs approximately 100 metres in length, pivoting about the centre axis to allow river traffic to pass. CANAL produced sleek and practical light box design with a 'shot peened' finish lining the sides of the bridge. CANAL also supplied the elliptical handrails which again were complemented with a shot peened finish to overall create this prestigious project.

| **MATERIALS**

SHOT PEENED STAINLESS STEEL
