## Thermotube Tube Heaters

Low power / High output - Low running cost - Eco friendly

A versatile heating solution that provides steady background heat that can be used in a variety of environments to offer frost protection and to prevent condensation.

# THERMOTUBE TUBULAR HEATERS - made in England since 1948.

Tube Heaters both in 110v and 240v that offer the ideal heating solution for applications that require low cost, steady background heat - our eco tubular heaters cost just £0.005 Per Hour / Per Foot to run\*.

Designed with safety in mind, our tubular heaters are a versatile heating product that can be used as a heat source or for frost protection and to prevent condensation. They can be used in a variety of environments; to provide greenhouse heating, to heat an airing cupboard where there is no longer a hot water cylinder, to stop condensation building on windows and walls and can be used in boats and caravans also.

All our Thermotube tubular heaters are IP54 rated and are produced in both 240v and 110v. Thermotubes are available from 1 to 6ft, at 60W per foot, supplied with mounting brackets and anchorage for each length. Available in standard colour parchment or white.

Part Number	Description	Output (W)	Length (mm)	Weight (Kg)
TH1H / -LV	1ft Tubular Heater	60	308	0.30
TH2H / -LV	2ft Tubular Heater	120	620	0.45
TH3H / -LV	3ft Tubular Heater	180	923	0.55
TH4H / -LV	4ft Tubular Heater	240	1226	0.86
TH5H / -LV	5ft Tubular Heater	300	1575	1.05
TH6H / -LV	6ft Tubular Heater	360	1837	1.10

We produce single as well as double guards to suit all size tubular heaters, which offer protection against the tubular heater surface. Where the very young or elderly are likely to be left unsupervised or where pets have access it is advisable to use a guard.

Linking kits (TBX2-Kit) are also available to allow for banks of heaters to be installed.

\*Costs calculated using £0.0854 kWh
