CASE STUDY FOR ARSENAL FC FUNDED RECREATIONAL MUGA

CASE STUDY FOR ARSENAL MUGA

Project Name: Arsenal FC Pitch, Multi Use Games Area Sports Pitch

Project Address: Abbey Road, London

Size of Project: 700m MUGA court

Works Carried Out:

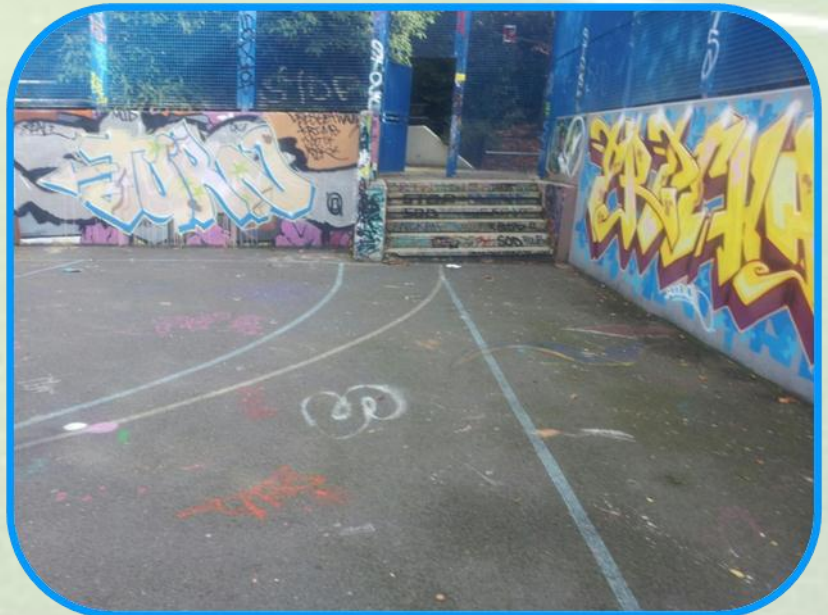

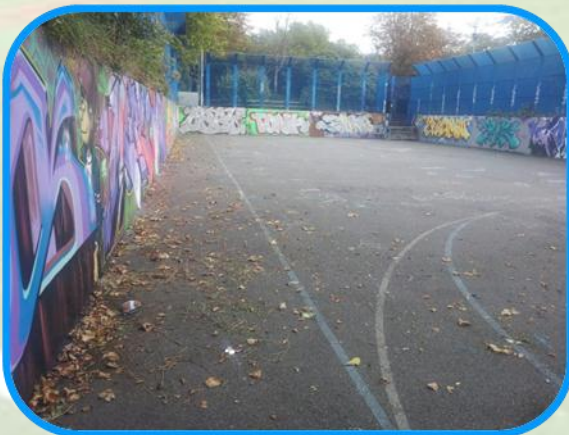

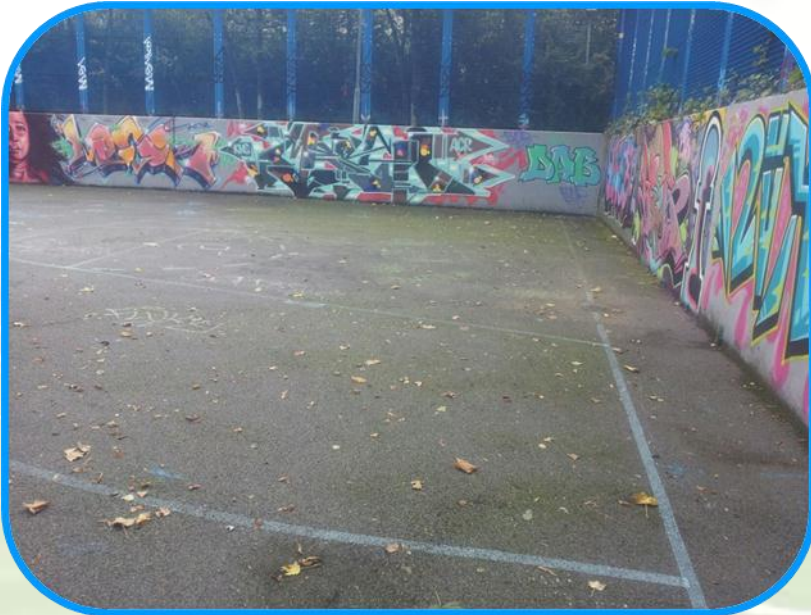

Upgrade Multi Use Games Area (MUGA) from an old existing macadam surface to a new 3G synthetic turf sports surface. The 3G sports surfacing was installed and infilled with sand and rubber crumb to give the playing characteristics for football. The existing flooring was slippery in need of an upgrade to all weather artificial surface.

I would thoroughly recommend Soft Surfaces and would definitely use the company again in the future due to their high quality finish and excellent punctuality throughout.

Thank you Soft Surfaces

OLD EXISTING MACADAM MUGA

There was an existing tarmac MUGA which was slippery and in need of an upgrade and renovation. Wall design and fencing was kept with the installation of new 3G artificial turf, for the use of further football training. Additional training MUGA for Arsenal FC.

COMPLETED SPORTS SURFACE MUGA

The completed synthetic sports surface pitch is now a new sports facility that will benefit the club massively. The project was completed successfully and the area will now be used much more efficiently as the all weather surfacing is ideal for football and multi sports
