IBM

IBM Lotus Notes and Lotus Domino 8.5.1 software.

Collaboration drives innovation

"XPages restores faith in the platform's future. It shows the way and again proves that Domino is not a closed environment."
— *Kjetil Andenas, Symfoni Software AS*

Easy and elegant for developers

Developing collaborative business applications has never been easier. With more than 280,000 IBM Lotus® developers, 10 million IBM Lotus Notes® applications and an open development environment based on the Eclipse platform, the Lotus community is thriving. And IBM Lotus Notes and Lotus Domino® 8.5.1 software helps take this success even further, delivering more value to the platform and to your business.

- Easily extend IBM Lotus Domino application development to all your developers—Web, Java™ and others—with freely available IBM Lotus Domino Designer software, built on the open and extensible Eclipse platform.*
- Save development time by writing applications once for use in both Web and rich client platforms by using XPages technology—now the de facto architectural standard in Lotus Notes and Domino software.
- Choose from a wide variety of widgets and reusable, open source assets from the online OpenNTF collaborative community.
- Accelerate the development of composite applications with out-of-the-box integration of existing assets such as Lotus Notes views and documents, IBM Lotus Symphony™ spreadsheets, IBM WebSphere® Host On-Demand applications and more.

Collaboration that's easy to buy

IBM has created new purchasing options that align with how you actually work rather than the tools you use. Just choose one of the two new IBM offerings to get the collaboration capabilities you need:

- IBM Lotus Domino Enterprise Client Access License: provides access to messaging and collaborative applications across all clients.
- IBM Lotus Domino Messaging Client Access License: provides access to messaging capabilities across all clients.

Both offerings include Lotus Notes, IBM Lotus iNotes®, Lotus Symphony and IBM Lotus Notes Traveler software.

Get your work done fast

Lotus Notes and Domino 8.5.1 software includes virtually everything you need to get work done and stay in control.

- Use Lotus Notes Traveler software on Apple iPhone. Send encrypted e-mail on Nokia Symbian devices.
- Use Microsoft® Internet Explorer 8, Mozilla Firefox 3.5 and Apple Safari 4 browsers.

Figure 1. Access Lotus Notes and Domino software on the device of your choice.
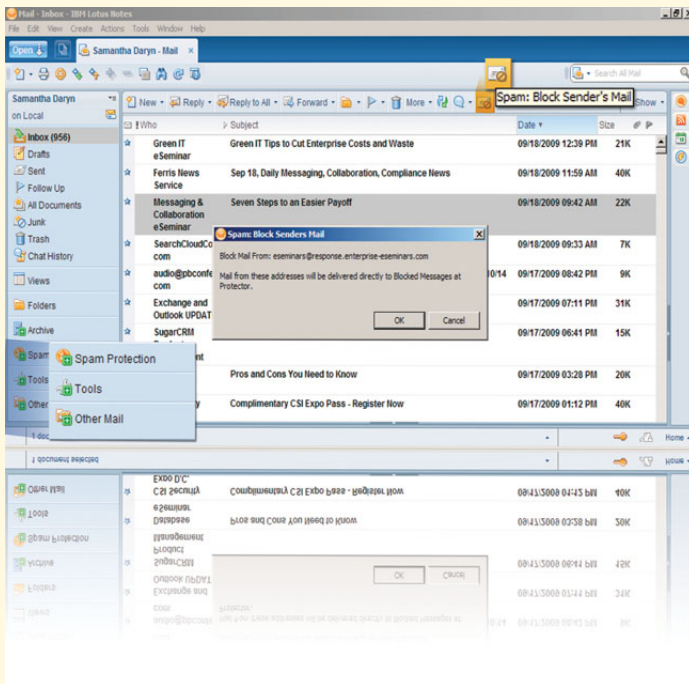

Figure 2. Use IBM Lotus Protector for Mail Security software to block spammers with a single click.

- Easily manage Lotus Notes user IDs for mobile users and administrators with the Lotus Notes ID vault.
- Take control of your in-box with the IBM Lotus Protector for Mail Security software appliance, integrated into the Lotus Notes client.
- Quickly create prepopulated meeting invitations by dragging and dropping an e-mail onto your day-at-a-glance calendar.

You can also choose how best to deploy Lotus Notes and Domino software. It is available as an on-premise solution, as an easy-to-manage IBM Lotus Foundations™ *Start* appliance or as Software as a Service with the IBM LotusLive™ service.
