ENVIRONMENTAL, TEMPERATURE & HUMIDITY TEST CHAMBERS

The complete supplier of Temperature & Humidity Environmental Test Chambers, Heating/Drying Ovens and Support Services.

**“The Unique independent Solutions Provider for All Your Temperature & Humidity Test Equipment Requirements”**

## **NEW Water cooling Options for Binder MKF Humidity Test Chambers**

The Binder MKF range of Humidity test chambers can be fitted with an optional water cooling system which allows the chambers to operate on a chilled water supply for greater efficiency and improved operating performance.

The benefits to the user of the Binder MKF humidity test chambers are:-

- Increased cooling capacity.
- High heat dissipation.
- Rapid Cooling down time.
- Low energy consumption.
- High energy efficiency.
- No room heating thanks to a controlled heat dissipation.
- Switchable between water and air cooling on the MKF 115 & MKF 240 models.

The water cooling option of the MKF humidity test chamber is now available and has the benefits of being more energy efficient due to a reduced consumption of electricity. The humidity test chamber has a greatly reduced heat output into the room the humidity test chamber is operated in thereby making it more comfortable for the operators and technicians.
