

TESLA TEST SYSTEMS

ENVIRONMENTAL, TEMPERATURE & HUMIDITY TEST CHAMBERS

The complete supplier of Temperature & Humidity Environmental Test Chambers, Heating/Drying Ovens and Support Services.

Binder MKF 720 Humidity Chamber fitted with Integral Compressed Air Dryer.

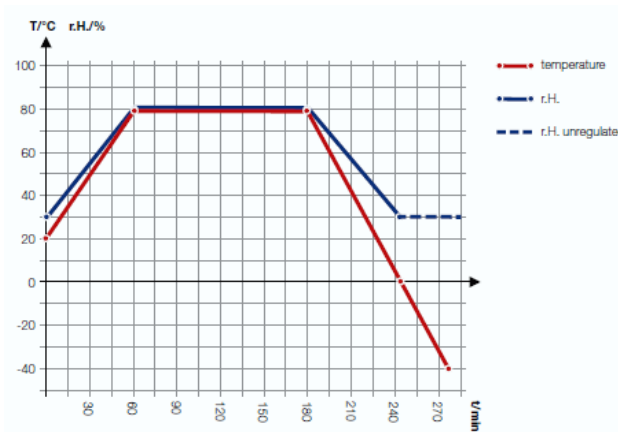

The Binder MKF 720 humidity chamber can now be fitted with a compressed air dryer to allow the user to achieve highly dynamic temperature and humidity changes as per the following chart. This optional accessory allows the user the following benefits:-

- Regulated compressed air dryer allows highly dynamic temperature and humidity changes.
- It particularly is well suited for delineating the various standards required by the automotive industry.
- It can achieve difficult test scenarios are possible such as 0°C at 30%RH.
- Realisation of very low dew points of down to -30°C.
- The specified temperature and humidity values are quickly achieved and accurately maintained.

The optional compressed air dryer will allow the user to achieve the following specifications:-

DIN EN 60068-2-30:2006-06	DIN EN 60068-2-38:2010-06	DIN EN 60068-2-66:1995-06
DIN EN 60068-2-78:2010-10	DIN EN 60068-3-2002-12	DIN EN 61215:2006-02, 10.11
DIN EN 61215:2006-02, 10.12	DIN EN 61215:2006-02, 10.13	DIN EN 61646:2009-03, 10.11
DIN EN 61646:2009-03, 10.12	DIN EN 61646:2009-03, 10.13	MIL STD 810:2000-01
