

## **Jtech Services Overseas**

Jtech Services have recently completed the supply of their vented metal pipe boxing system at the refurbishment of a medical facility in the Middle East.

A complete kit of items were sent, even down to wall fixings and colour matching screws for the pipe boxing itself.

The client specified a particular RAL colour to match with other furniture and equipment that was being used on the project.

All items were coded so that everything matched up on site. Along with this, installation instructions and drawings were emailed ahead so that installation could start as soon as the materials arrived.

Because this product is both robust and practical as well as aesthetically pleasing it is ideal for high traffic areas and, as with all of the Jtech pipe boxing systems, it comes complete with the usual range of accessories such as internal and external corners, stop ends, joint covers and stop ends.
