

# Labino® SuperXenon 35 & 50 w

## DOCKING BATTERY | SUPER POWERFUL

## MAKES IT BRIGHT

Labino® SuperXenon 50 W UV lamp is one of the most powerful handheld UV lamp on the market! The 50 W Xenon bulb offers an extremely high UV intensity, providing a very clear excitation of fluorescent material. This lamp makes it possible to search very large areas as you can use a floodlight reflector and still see excitations in daylight and at great distances. The SuperXenon is also available with a 35 W bulb if lower intensity is required.

The Labino® SuperXenon lamp contains the electronics and bulb in a single housing and is available with no handle, a pistol handle as well as a top handle. You can choose between three distinctions – floodlight, midlight or spotlight – each giving different beams and intensities.

This product can be operated by two different power systems – battery as well as via a PSU. The battery is a docking battery. You can easily replace to a new battery and charge the used one separate from the light. You can also switch between a battery and mains power supply unit (PSU) on the same lamp by switching the docking devices – both fit to the same lamp. The Labino® SuperXenon lamp obtains full power in 5-15 seconds and can be switched on and off whenever used, without pre-cooling and it is unaffected by magnetic fields. Manufactured in Sweden.
